

# Jihad Sayed Omar

## Front-End Developer

Location: Al-salhiya Al-gadida, Al-sharkia • +20103 3671306 • [gehadsaied199@gmail.com](mailto:gehadsaied199@gmail.com)

GitHub: <https://github.com/gehadsayed1> LinkedIn: <https://www.linkedin.com/in/jihad-sayed-91055535b>

## Professional Summary

Passionate and detail-oriented Front-End Developer with a strong foundation in HTML, CSS, JavaScript, and modern frameworks like React. Dedicated to building responsive, user-friendly, and visually appealing web interfaces. Experienced in problem-solving, UI/UX design, and delivering seamless user experiences. Seeking to contribute to innovative projects and the growth of a dynamic team.

## Projects

### TRUE FIT

Built a responsive, user-friendly interface for a gym locator web app. Implemented Redux, Axios, React-Router-Dom, JWT, and social authentication via Google and Twitter for seamless navigation and authentication.

### Smart Template

Developed a dynamic certificate generation system using jsPDF and React. Supported exporting certificates in both PDF and image formats with user data integration.

### E-commerce Platform

Created a user dashboard to manage products, orders, and users. Integrated payment options including Fawry using i18next and react-loading-skeleton for better UX.

### To Do List App

Built a task management tool supporting task creation, editing, prioritization, and deadline tracking with image attachments.

### Movies App

Designed a movie browsing app with a section for trending films, real-time updates, and detailed movie info.

### Business Management System – Vue.js

Built a full-featured platform for a business courses company using Vue.js, Tailwind CSS, Pinia, and Vuetify. The system included student registration, booking, exam management, and SRM (Student Relationship Management).

### Apshar Bil Khair Portfolio Website

Developed a full portfolio website for *Apshar Bil Khair*, a company handling travel procedures. Designed and implemented using Vue.js and Tailwind CSS.

### Landing Page for Software Company

Designed and implemented a responsive landing page for a software company using Vue.js and Tailwind CSS.

## Expense Management Website

Created a site for managing expenses with features such as adding, tracking, and categorizing expenses using Vue.js, Pinia, Vuetify, and i18next for multilingual support.

## Skills
